

Enterprise Navigator™

Turn-by-Turn Navigation for Windows Mobile Handheld Computers

Enterprise Navigator turn-by-turn navigation software with voice guidance is designed for enterprise users. It delivers the features enterprises need, plus an API for integration with third-party mobility applications.

> FEATURES

Dynamic Route Guidance: Provides spoken, turn-by-turn directions to any address nationwide.

Automatic Route Recalculation: Directions are updated every second. If you miss a turn, you get new directions immediately.

Voice Prompts: Clear voice instructions give you the exact distance to your next turn and the type of turn.

Map Display: Clean, clear graphics show maneuver instructions and other information.

Driving Safety: Configure Enterprise Navigator to avoid U-turns and set alerts to warn driver when the speed limit is exceeded.

Auto-Zoom: Map automatically zooms in as driver approaches the next maneuver.

Time and Distance: ETA/Distance to destination.

Points-of-Interest: Access to points-of-interest including fuel stations, restaurants and more that can be made available to drivers, or locked out.

Custom Points-of-Interest: Import your customers, stops or other landmarks.

Simplified Installation and Licensing: Designed for enterprise deployments.

Map Availability: USA, Canada, Mexico, Brazil, Australia, Europe, Middle East and others. Contact Electric Compass for more information.

Language Support: English, French, Spanish and others.

> INTEGRATION

API for integration with third party applications:

- Supports C++ and .NET development environments including C#, Visual Basic, etc...
- Control Destination input, Configurations, etc...

For more information on **Enterprise Navigator**, contact **Electric Compass** at sales@ElectricCompass.com or +1.203.654.7720

> BENEFITS

- Developed for enterprise users
- Reduce unnecessary mileage and fuel costs by providing accurate driving directions
- Improve on-time performance as drivers are less likely to get "lost" or follow inefficient routes
- Increase safety with "Eyes free" voice interface
- Reduce vehicle engine idling time as drivers lookup customer locations on maps
- Shorten training time for new drivers

> TECHNICAL INFORMATION

- Windows Mobile 5/6; Windows CE 5
- 1-2 GB SD Card recommended for map storage
